SUMMARY

Full stack engineer with over five years of experience building production web and mobile products, integrating AI systems into real applications, and running automation pipelines that support business operations. Comfortable owning a project end to end, from interface design in Figma through to backend logic, API integrations, and deployment. Founder of a small digital agency serving clients with web design, mobile app development, and AI integration work. Known for delivering fast, lightweight builds that perform well even on low end devices, and for direct, precise communication with clients and teams.

EXPERIENCE

Founder and Lead Developer YTGT (Ytreak Global Technologies), Abuja, Nigeria 2022 to Present

- Run a small digital agency delivering web design, mobile app development, AI integration, and automation projects for clients
- Design and build client websites and web apps using React, WordPress and Elementor, and vanilla JavaScript, with a focus on speed and mobile performance.
- Integrate the Anthropic API into client facing tools to add AI powered features such as chat assistants and content generation.
- Manage client relationships directly, from initial outreach and scoping through delivery and ongoing site maintenance.

Fortune Converts, Personal Project — 2026. January 2023 to Present

- Built a browser based image conversion tool supporting formats including PNG, JPEG, WebP, BMP, GIF, TIFF, ICO, SVG, AVIF, and HEIC, with adjustable output quality and batch download as a ZIP file.
- Integrated an in app AI assistant, Forb, to answer user questions about the converter directly inside the interface.
- Handled all image processing client side in the browser, avoiding server uploads and keeping conversions fast and private.

African Kingdom Restaurant, Bar and Club, Client Website — 2026.

- Built and maintained data flow systems connecting internal tools and external services.
- Debugged integration issues to keep data moving reliably between connected systems.

SELECTED PROJECTS

Personal Portfolio Website 2026

- Built a full portfolio site from scratch in React, featuring an animated hero section, animated skill and stat sections, and a custom infinite loop project slider built with a five node DOM pool for smooth performance

Forb AI, AI Chat Assistant Ongoing

- Developed an AI chatbot product powered by the Anthropic API, including user authentication, subscription and support for multimodal input.

Accom, Accommodation Marketplace App Ongoing

- Built a React Native marketplace app for booking accommodation, including escrow style payment handling, multi screen booking flows, and state management with Redux and Expo Router

YTGT Agency Website 2026

- Built the agency website from the ground up, including a skills dropdown navigation, testimonials carousel, portfolio section, and a full multi column footer with an inline contact form
- Optimized the site for low end Android devices and configured it as a Progressive Web App with a manifest and service worker

A Luxe Skin, Client Website 2026

- Developed treatment pages and improved image placement and layout for a skincare client's staging site
